

# MaxiCut 3 Oil® – Assured Protection

Non Slip Grip Technology. Designed for moderate cut resistance in oily and dirty conditions

Where grip is essential. Cut Level 3.

34-420

## CutTech® technology platform

**Innovative fibres** - ATG source their own ingredients to develop their own unique high performance yarns and fibres that offer cut protection whilst maintaining high levels of comfort.

**Reinforcement** - between the thumb and forefinger, improves cut resistance and extends glove life in an inherently weak area.

## ErgoTech® technology platform

**Form, fit and feel** - mimics the “hand at rest”, reducing hand fatigue and increasing comfort.

**Latest knitting technology** - utilized to produce smooth and rounded fingertips, improving fingertip sensitivity.

**Consistent liner penetration** - from the nitrile, leaving only the soft liner resting against the skin.

## GripTech® technology platform

**Optimized grip** - delivered through the micro-cup finish allows for a controlled grip.

## LiquiTech® technology platform

**Liquid repellence** - through use of two technology platforms, layered on top of one another, we have ensured increased resistance to oils via our LiquiTech® technology platform.

## Hand Care® technology platform

**Skin friendly** - The well-being technology eliminates all traces of process chemical and odours. MaxiCut® Oil is “skin friendly” and certified to the Oeko-Tex 100® standard, which means the gloves are **certified** that they do not contain any harmful/carcinogenic solvents.

## Sanitized technology platform

**REACH compliant** - All ingredients used in the manufacturing and construction of MaxiCut® Oil are compliant with REACH - “Registration, Evaluation, Authorisation and Restriction of Chemical substances”. REACH is a new EU directive with the key aim to provide high levels of protection to human health & environment.

Built-in anti-microbial & odour protection

\*\*Gloves should always be tested to determine the suitability for the proposed application

Unique hand protection through Technology, Innovation & Design
