

MaxiFlex® – Precision handling gloves

Nitrile Foam on a Seamless Nylon/Lycra® Liner

34-874

34-878

34-876
(FULLY COATED)

34-847 ENDURANCE
(DRIVER STYLE, FULLY COATED
WITH RAISED NITRILE DOTS)

ErgoTech® technology platform

25% thinner - than most foam nitrile gloves on the market whilst offering twice the mechanical performance.

Form, fit and feel - mimics the “hand at rest”, reducing hand fatigue and increasing comfort.

Latest knitting technology - utilized to produce smooth and rounded fingertips, improving fingertip sensitivity.

Consistent liner penetration - from the nitrile, leaving only the soft liner resting against the skin *i.e. no strikethrough*

GripTech® technology platform

Optimized grip delivered through the micro-cup finish allows for a controlled grip.

AirTech® technology platform

360° breathability - patented micro-foam nitrile coating offers 360° breathability, making it the most breathable glove on the market today.

Hand Care® technology platform

Skin friendly - The well-being technology eliminates all traces of process chemical and odours. MaxiFlex® is “skin friendly” and certified to the Oeko-Tex 100® standard, which means the gloves are **certified** that they do not contain any harmful/carcinogenic solvents.

Sanitized technology platform

REACH compliant - All ingredients used in the manufacturing and construction of MaxiFlex® are compliant with REACH - “Registration, Evaluation, Authorisation and Restriction of Chemical substances”. REACH is a new EU directive with the key aim to provide high levels of protection to human health & environment.

Built-in anti-microbial & odour protection

4131

**Gloves should always be tested to determine the suitability for the proposed application
