

# MaxiTherm® – Cold temperature work gloves

Natural Latex on a Seamless Acrylic/Polyester Liner with Patented Non-Slip Grip. Cut Level 2.

30-201

## CutTech® technology platform

**Innovative fibres** - ATG source their own ingredients to develop their own unique high performance yarns and fibres that offer cut protection whilst maintaining high levels of comfort.

**Reinforcement** - between the thumb and forefinger, improves cut resistance and extends glove life in an inherently weak area.

## GripTech® technology platform

The micro-cup non-slip grip finish allows for a controlled and superior grip in oily and wet applications. The non-slip grip is only applied where it is actually needed - in the palm area - to ensure flexibility isn't compromised.

## LiquiTech® technology platform

**Liquid repellence** - we have increased resistance to oils via our LiquiTech® technology platform.

## Hand Care® technology platform

**Skin friendly** - The well-being technology eliminates all traces of process chemical and odours. MaxiTherm® is "skin friendly" and certified to the Oeko-Tex 100® standard, which means the gloves are **certified** that they do not contain any harmful/carcinogenic solvents.

## Sanitized technology platform

**REACH compliant** - All ingredients used in the manufacturing and construction of MaxiTherm® is compliant with REACH - "Registration, Evaluation, Authorisation and Restriction of Chemical substances". REACH is a new EU directive with the key aim to provide high levels of protection to human health & environment.

Built-in anti-microbial & odour protection

\*\*Gloves should always be tested to determine the suitability for the proposed application

Unique hand protection through Technology, Innovation & Design
