Stellar[®] S6 with Ecotek Biodegradable Technology

Nitrile Industrial Gloves

The STELLAR S6 nitrile industrial glove was designed as the go-to solution for 6 mil hand protection. Featuring a design that ensures the fingers and palm are the right mix of durability and sensitivity for fine detail work and dependable durability, SW's MilTek production process allows not only strong, high-dexterity performance but also ensures a tear-resistant cuff that makes donning and doffing a breeze.

Recognizing that environments are sensitive to chemicals sometimes left behind in the

manufacturing of lesser gloves, SW has developed TouchTek which provides cleaner gloves and minimizes contaminants that can compromise work or add extra steps to preparation.

The STELLAR S6 is Dermatologically Approved by the Skin Health Alliance and has met stringent standards that ensure skin safety.

TouchTek™ On the outside, TouchTek technology reduces the contamination of sensitive materials and workspaces.

On the inside, TouchTek reduces the chemicals that can be absorbed through the skin, leading to irritation or painful reactions.

MilTek™ A technology that delivers a more consistent thickness across the entire glove, minimizing the differences from finger to palm and from palm to cuff.

EcoTek™ Long term landfill biodegradation testing according to ATSM D5526-12 reported 95.6% biodegradation of gloves with **EcoTek™** in only 945 days.

EcoTek™ Biodegradability Technology

EcoTek™ is an important technology SW has developed in support of global sustainability initiatives. The new technology dramatically accelerates biodegradability of our nitrile gloves ultimately in landfills.

Gloves are the Same, Only Better:

SW nitrile gloves updated with EcoTek Biodegradability Technology deliver the same performance and comfort as the non-EcoTek gloves, but are rapidly biodegradable in landfills.

Rapid Biodegradability:

SW nitrile gloves with EcoTek biodegrades in landfills through the action of naturally occurring microorganisms. Long term landfill biodegradation testing according to ASTM D5526-12 has reported 95.6% biodegradation of our gloves with EcoTek in only 945 days. Non-EcoTek nitrile gloves exhibited virtually no degradation (up to only 1.1%) during the same period. ASTM D5526-12 test results do not predict future biodegradation.

Contribution to Global Sustainability:

SW's EcoTek Biodegradability Technology ultimately reduces waste, saving valuable landfill space by facilitating the breakdown and return of nitrile gloves to nature in timeframes that can be measured in months and years rather than centuries.
